IPDStyle Gasket Sets

DID YOU KNOW...IPD offers both OE style and IPDStyle 1-2-3® gasket sets for most engine applications. If you are new to the concept of IPDStyle Gasket Sets, please note the many features and benefits that make these sets among the most popular IPD products available:

- Comprehensive sets available for (1) out-of-frame and (2) in-frame engine overhauls, and (3) cylinder head replacement servicing (all you need in one box/one part number)
- Innovative set configuration saves you time (bagged sub-assemblies with identification numbers, complete contents list provided, replaces multiple OEM style sets)
- Premium materials for reliability, longevity, and performance you can rely on

SPOTLIGHT

IPD Parts for 3500 Series Engines

3500 Series Engine Cylinder Head Bolts

Don't forget about IPD's superior quality cylinder head bolts for your next 3500 series engine service. These IPD-branded grade 12.9 ISO class standard bolts (i.e., superior grade strength), and are made to last. Order part number 7N1961 today and discover the **IPD Difference**.

3500 Series Engine Connecting Rod Bearings

New IPD Connecting Rod Engine Bearings (part number 3558508, replaces 1077330) were developed because of a need in the market for improved load carrying capability for high stress engines. These new bearings provide 19% higher load carrying capability, improved cavitation resistance, and enhanced durability.
