BREAKING NEWS:

IPD AWARDED PATENT FOR ARTICULATED TWO PIECE PISTON!!!

The United States Patent and Trademark Office awarded **Patent No. 7938093** to IPD for the **IPDSteel™** articulated two piece piston. This landmark achievement demonstrates IPD's leadership in the area of technological innovation within the industrial engine repair parts industry.

Features and benefits of IPD's patented design include as follows:

- ◆ High strength, durability, and heat resistance
- ◆ Wear resistant and dimensionally stable under conditions of high heat and pressure
- ◆ Improved heat distribution for enhanced thermal transfer efficiency
- ◆ Controlled thickness for mechanical and thermal consistency

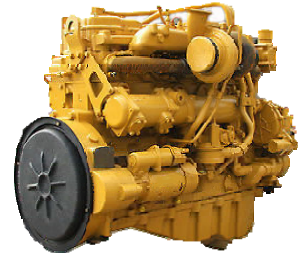

This design improves overall thermal transfer between the piston crown and cooling system of the engine, and is the same technology as can be found in patent-pending **IPDSteel™** one piece pistons. **For guaranteed performance without risk to reliability...Choose IPD!**

NEW PRODUCTS

NEW PRODUCTS FROM IPD

IPD is growing, and continues to expand to better serve our customers. Since our last Newsletter, we have added over 28 new part numbers to our product line (a few highlighted below). Please click on the link below for a complete list.

G3600 Application

Single Cylinder Head Replacement Set (includes 1432878 Fire Ring) **360004**
Gasket Set, Single Cylinder Head (OE Style, no fire ring) **1711496**

C7 Application

Gasket Set, Single Cylinder Head **2975350**

3508 / 3512 / 3516 / 3520 Applications

Gasket Set, Single Cylinder Head **3550772**

IPD EGR PISTON FOR ISX

IPD recently launched several new parts kits for Cummins® ISX EGR engine application (shown below). These kits feature a new "closed skirt" design EGR piston, featuring a reduced diameter top land that helps to reduce oil consumption, and minimizes liner polishing due to carbon packing.

- ◆ EGR Piston Kit # **2881878**
- ◆ Cylinder Kit # **PLG2881878**
- ◆ In-Frame Kit # **IF1878/96**

TECHNICAL BULLETIN

IPDTB-0027: C10 & C12 HEAD GASKET IDENTIFICATION

This Technical Bulletin provides information on identification of the correct cylinder head gasket to use during a repair procedure on C10 and C12 engines. Engine serial and arrangement numbers only indicate the “original” cylinder head gasket with which the engine was assembled, and may not indicate the correct head gasket to use for repair. When cylinder heads or blocks are exchanged, the design of the replacement castings may require a different head gasket. There are two types of head gaskets, cylinder blocks, and cylinder heads that must be identified to confirm the correct cylinder head gasket.

Note:

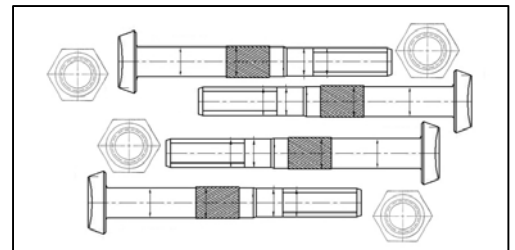

- ◆ All IPD Technical Bulletins are available at www.ipdparts.com.
- ◆ IPD Distributors can access IPD's exclusive Technical Support line through www.ipdparts.com (select “IPD Technical Support” in IPDNet™).

DIFFERENTIATION BULLETIN

IPDDB-0011: IPD CONNECTING ROD BOLTS & NUTS

Connecting rod bolts and nuts should be replaced after a major failure, or if there is any indication corrosion, pitting, scratches, and/or thread or shank damage. Some aftermarket alternatives do not inspire confidence, which is why IPD committed to providing high quality replacement bolts and nuts for the following popular Caterpillar® engine models:

- | | |
|--|--|
| ◆ 3304 / 3306: | <u>1P9956</u>
<u>5S6348</u> |
| ◆ 3406 / 3408 / 3412 (A, B, & early C models): | <u>6N8942</u>
<u>8L3441</u> |
