NEW IPD WARRANTY

IPD is pleased to announce a new warranty policy (effective 08/01/12). The new policy now features a full year of additional warranty coverage for the following parts classifications:

- New IPD diesel parts for on-highway vehicle applications
- New IPD natural gas & methane parts (all except valve train)

Parts within the above noted categories are now covered for **2 years** in duration from the date of installation (note: total warranty duration not to exceed 3 years from date of original invoice).

DID YOU KNOW...Warranty coverage for all IPD brand parts extends from the date of installation (see policy for total warranty duration limits). Do not be deceived by lesser so-called competitors that only warranty their parts from the date of purchase.

NEW IPD TECHNICAL SERIES VIDEO

IPD has prepared a new Technical Series Video for your review. This 6th video release in the series provides important information on protecting ISX/QSX engine bearings from dirt and contamination during the repair process using IPD-supplied plugs in the oil ports while exposed (included in IPD Engine and Gasket Kits). Click on the image (or on the link below) to view this video.
