NEW IPD TECHNICAL SERIES VIDEO

IPD has prepared a new Technical Series Video on a popular topic of inquiry, IPD's exclusive Crevice Seal (CS) liner (currently available for Cat 3400 and C15 engine applications). IPD Crevice Seal liners provide many advantages, such as:

- wider sealing surface area
- reduction in liner movement
- reduced fretting of liners, liner o-rings, and block
- reduced liner cavitation
- reduced flange stress

Discover why IPD's CS liners are a great alternative to OE style liners. Click on the image (or on the link below) to view video.

NEW SERVICE

NEW IPD ON-LINE BILL PAY SERVICE

IPD now has an on-line bill pay service where customers with an IPD corporate account can view their history of purchases, as well as outstanding invoices. Also, customers can print invoices and statements, submit payments, and apply these payments as needed to any outstanding invoices.

This system provides real-time account information, as well as secure credit card processing. As an added convenience, if you so choose, this system will securely retain your credit card information for faster future payment transactions (optional).

A link button to this service is now available on the top header bar of IPD's main page, or you can link directly to the site. To begin using this new system, please visit the On-Line Bill Pay website, and click on "Request new user access".
