The Standard for Quality, Innovation, Service and Support Since 1955

HAPPY NEW YEAR

IPD would like to wish a Happy New Year to all of our valued customers! We are planning several new product launches this year that will help us to help you expand your service opportunities with your customers. We look forward to working with you, thank you for your business!

NEW...IPD REMANUFACTURED FUEL INJECTORS FOR DETROIT DIESEL APPLICATIONS

New IPD remanufactured fuel injectors are now available for Detroit Diesel® 50 & 60 Series engines, with coverage for 27 original equipment part numbers. Each IPD injector is thoroughly checked in a number of key areas, as per IPD's specified cleaning and inspection process. Also, an industry-leading number of new "critical" components are replaced on each injector, including the load plate, spring seat, NOP spring & shim, armature & solenoid screws, nozzle, and o-rings.

NEW...MARTIN WELLS HEAVY-DUTY VALVE TRAIN

This is to provide pre-release information on Martin Wells Valves and Seats for heavy-duty applications, including Cummins, Detroit Diesel, John Deere, Mack, and Navistar engines. Martin Wells has long been known for high quality and cost effective valve train. Now application information is available for selected valves and seats together in an easy to reference Product Bulletin (see link below). Please contact your Customer Service representative for details. Pre-Release Program orders are being accepted at this time. Availability is planned during the 1st quarter of 2013.

ENGINE BUILDER MAGAZINE C7 ENGINE ARTICLE

Engine Builder Magazine recently launched their 2012 November Engine Rebuilding Technical Guide (supplement to Engine Builder Magazine), and IPD was among the technical contributors that assisted with the preparation of an article on Cat C7 common rail engines. This article explores the differences between early and late model C7 engines, and related servicing opportunities. A copy of this article can be viewed by clicking on the following link.
