NEW IPD TECHNICAL SERIES VIDEO & BULLETIN

A new IPD Technical Series video is now available, featuring critical information on the importance of using compatible valvetrain components in Cat® 3500 series engines (note that multiple component updates have occurred in these engines, and some changes are specific to select machines and/or applications). IPD's Technical Bulletin (IPDTB-0008) on this subject has also been updated, and now includes an improved reference graphic illustration, and an extended listing of compatible valvetrain parts groupings.
