

NEW IPD ROCKER ARMS FOR SELECT CATERPILLAR C15 AND C18 SERIES ENGINES

Quality rocker arms from the brand you can trust and service you can rely on

IPD's new rocker arms for popular C15 and C18 series engines use the highest quality parts to keep your engine running smoothly. These rocker arms feature:

- Forged alloy steel body with added chromium, molybdenum, and manganese for maximum fatigue strength and durability.
- An alloy steel pin case hardened and coated with DLC (diamond like carbon) on the wear surface. DLC is a micron thin layer of tribologically advantageous hard carbon that minimizes friction and provides maximum protection against abrasive wear and scuffing
- Roller is high carbon steel with precision tapered crown with an ultra-fine surface finished OD for maximum longevity in demanding applications.
- Bushings in (4373861 and 4373869) rocker arms are bi-metal with steel backing and copper-lead-tin alloy for optimized load acceptance and foreign particle embeddability.

Every Rocker Arm Arrives in IPD's Innovative and Protective Packaging

This packaging features recyclable green plastic that cradles the rocker arm assembly and protects against damage. The case can be reused to hold screws, nuts, bolts and other small components.

4373861	Rocker Assembly for C15/C18, On-Highway and Industrial Machines
4373863	Rocker Assembly for C15/C18 On-Highway and Industrial Machines, bushing-less precision-machined bore
4373869	Rocker Assembly for C15/C18 On-Highway and Industrial Machines
