

IPD CHROMOLY STEEL LINER FOR C16 APPLICATIONS

Enhance durability with the power of steel!

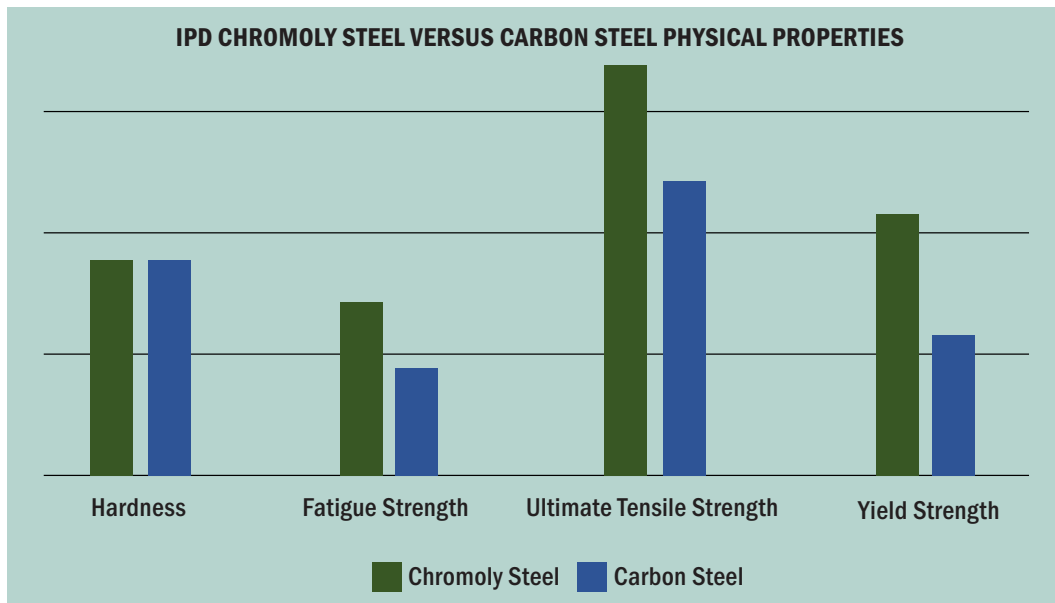

With the success of IPD's steel liner for the Caterpillar C18/C32 applications, we are proud to unveil our latest innovation in engine technology: the steel liner for Caterpillar C16 diesel engines.

We have applied the same innovation and engineering to create a chromoly steel liner for the C16 (4739034STL).

Built to withstand the toughest conditions, this cutting-edge upgrade is the ultimate solution for extending the life of your C16 engine.

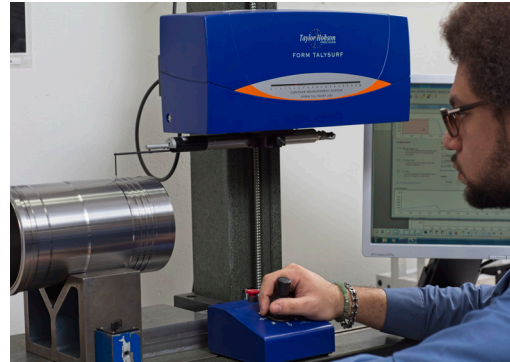

Traditional liners are cast iron and more susceptible to cracking.

YOU CAN FEEL THE IPD DIFFERENCE WITH THE POWER OF STEEL!

THE BENEFITS OF IPD'S STEEL LINER:

- Chromoly steel offers an ultimate tensile strength (UTS) that is 2 to 3 times more than the ultimate tensile strength of ductile cast iron.
- Chromoly steel offers increased toughness on the inside (for improved wear life) and on the outside (for improved resistance to cavitation).
- Made from a seamless tube of high-quality chromoly steel (no weld seam that can crack)
- Long-lasting durability and reduced maintenance result in significant cost savings over the lifetime of the engine.
- This new steel liner for the Caterpillar C16 follows the successful launch of our chromoly steel cylinder liner for the C18/C32 as well as for ISX /ISX15.

IPD Engineering validates steel cylinder design using contour measuring machine.

IPD Product Availability

IPD provides a wide range of quality, precision-engineered parts for the entire range of Caterpillar products beginning with the C6.4 up to the Caterpillar 3600 series.

Product availability includes:

- Engine Overhaul Kits
- Pistons and Piston Kits
- Cylinder Liner Kits
- Valvetrain Components
- Engine Bearings
- Gasket Sets
- Water Pump, Oil Pumps and Oil Coolers
- Rocker Arms
- Head Bolts and Spacer Plates

To experience the durability of our steel liner for C16 engines, contact your IPD distributor or order through IPDNet at store.ipdparts.com
